Space Installation 250813

Acrylic glass, dichroic coated and printed
Steel profile, perforated

approx. 140x140x310 cm (variable)

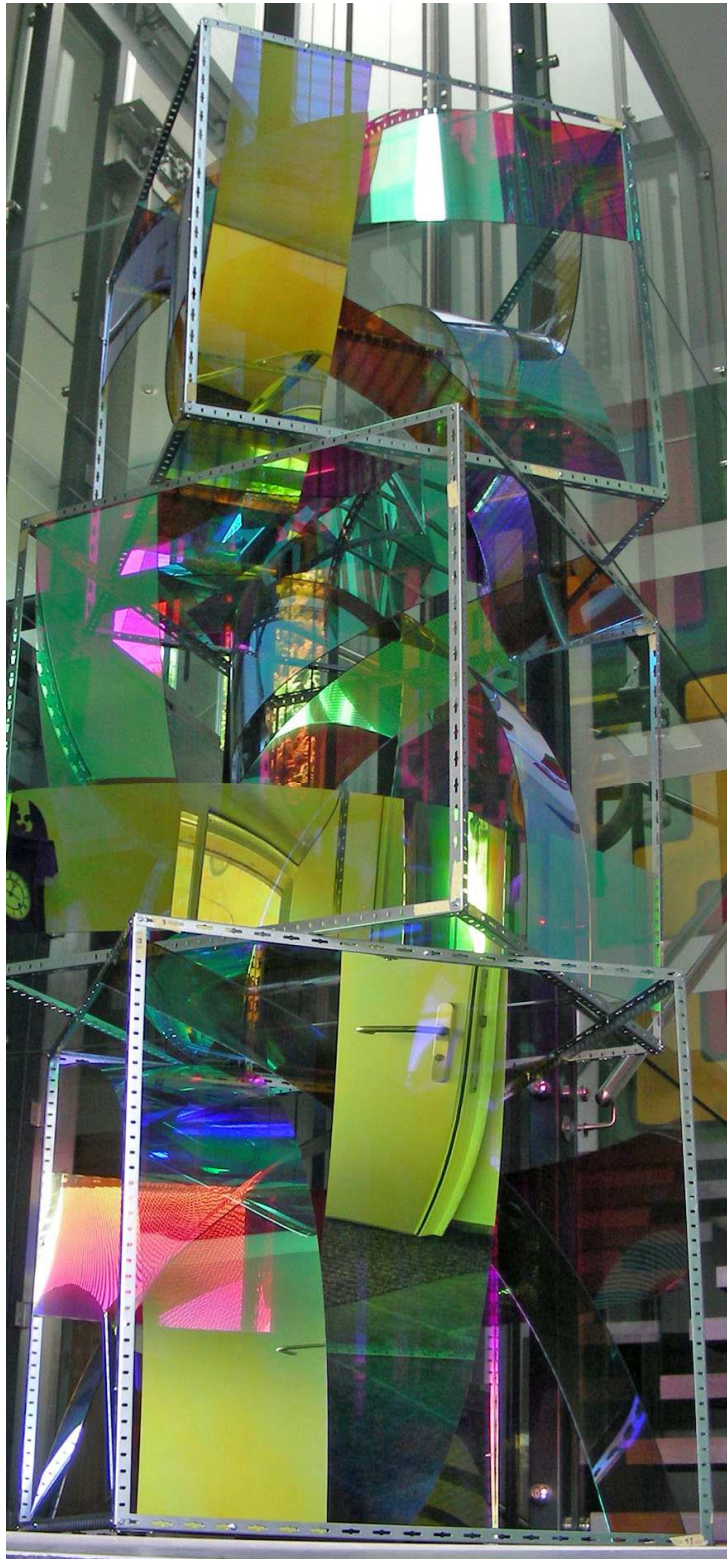

Space Installation 250813

The space installation 250813 depicted here consists of three cubes measuring 1x1x1 metre. Each cube is composed of a metal frame with perforated profiles, into which intersecting acrylic glass plates are fitted. These acrylic plates are printed with geometrical patterns, and as they mirror each other, a moiré effect emerges. By changing the viewpoint, position and/or the lighting, not only the colour of the objects changes, but also, because of the moiré effect, the patterns on the printed surfaces alter.

Any desired number of cubes can be combined either horizontally or vertically. Thus, the installation appears in new dimensions and can be changed to harmonize with the surroundings.
